

Introducing the Aruba Instant On 1430 Switch Series

When running a small business, simplicity, reliability, and cost-efficiency is key – and that’s no different when it comes to network connectivity. The Aruba Instant On 1430 Switch Series is a modern plug-and-play solution designed to help small businesses achieve reliable network connectivity, even on the tightest budgets. It’s the ideal solution for home offices and small professional offices that may not have dedicated IT support.

The key features of the Aruba Instant On 1430 Switch Series

- Unmanaged Layer 2 Gigabit Ethernet switch series ready to deploy in 5-, 8-, 16-, 24-, and 26-port models
- Up to 124W of PoE to power APs, IP Phones, and other IoT devices
- No configuration or management needed
- Plug-and-play with fully automated functions and zero ongoing maintenance
- Quality of Service (QoS) and flow control for improved network efficiency
- Fan-less with Energy Efficient Ethernet for low power consumption
- Class B certified for home office networks (5 and 8 port models)

Aruba Instant On 1430 Switch Series highlights

- **Simplicity**
Thanks to the plug-and-play set up, it works right out of the box, with no configuration required.
- **Connectivity**
Small businesses can always enjoy reliable connectivity thanks to the Gigabit Ethernet speed, providing PoE to power devices like APs and IP phones.
- **Support**
This solution includes industry leading limited lifetime warranty and support, with access to the 24/7 chat function for the entire warranty period.

- Seamless

Aruba Instant On products work together to provide a seamless Wi-Fi experience. Wired and wireless voice traffic is prioritized with high QoS priority end-to-end for optimal voice performance.

Upgrading to AIO 1430 from HPE Office connect 1405 and 1420 Switch Series

Small businesses that upgrade their network to the Aruba Instant On 1430 Switch Series will enjoy an enhanced experience in a number of ways, including:

- More PoE ports
Users can connect more IoT devices with PoE enabled on all 15 ports
- Better user experience
Benefit from Spanning Tree BPDU Forwarding for improved spanning tree efficiency and 802.1x EAPoL forwarding for faster user-client authentication
- Better warranty
The Aruba Instant On 1430 Switch Series comes with limited lifetime warranty, compared to 3-year warranty on the HPE OfficeConnect 1405 series
- Smoother migration
Both switch series work together so businesses can migrate at their own pace
